

# Spray-On Polyurea Containment Systems

## Serving the Shale Gas Industry

### PREMIUM PROTECTIVE COATINGS LLC

Premium Protective Coatings LLC (PPC) provides turnkey containment solutions. We provide complete secondary containment, as well as mobile containment units. We specialize in the applications of heavy duty polyurea spray-on liners.

#### HYDRAULIC FRACTURING APPLICATIONS:

- Containment Liners
- Frack Pits
- Fuel Storage
- Tank Farms
- Drill Sites
- Retaining Wells
- Storage Tanks
- Spillways
- Reservoirs
- Ponds

#### 10 YEARS OF POLYUREA EXPERIENCE

PPC has a decade of experience applying spray-on polyurea for both corporate and municipal clients. We have certified polyurea applicators, as well as state-of-the-art mobile capability, bringing spray-on lining technology to the most remote location. We can apply spray-on linings in any temperature, no matter how hot or cold.

#### POLYUREA OUTPERFORMS POLYETHYLENE LINERS

Polyurea is tough. A standard polyurea liner is five times more puncture resistant than polyethylene. It is also recognized as superior by the EPA. Polyurea is unaffected by fracturing chemicals, has no seams and can't leak. It cures instantly, is permanently flexible, and unaffected by frigid temperatures or intense heat.

#### POLYUREA IS SAFE FOR THE WORK SITE AND THE COMMUNITY

Spray-on polyurea is environmentally safe, emitting zero VOC's (Volatile organic compounds). Polyurea's anti-skid surface promotes a safe working environment.

#### SPRAY-ON POLYUREA TECHNOLOGY:

- Unaffected by Common Industry Chemicals
- Seamless and Flexible
- Adheres to Concrete and Metal
- Maintenance Free
- Contains Zero VOC's
- Durable and Puncture Resistant
- 20+ Year Guarantee

LOCALLY OWNED AND OPERATED IN HERSHEY, PA
